

Learning in Bell classes is challenging and always improves my language skills. The teachers are kind and helpful. The teaching system is well-organised and always gives me an opportunity to speak in classes. My favorite things to do in my class are expressing my opinion to my classmates and teacher and brainstorming ideas. Doing activities in groups gives me a chance to share my ideas as well as listen to my friends' opinions.

Bell classes consist of 16 students per each class. The advantage of learning in small class is that the teacher can take care of all the students and the students can gain a variety of skills, which is different from the normal classes that teach only grammar.
